

## Cerner Set Up for Rotation

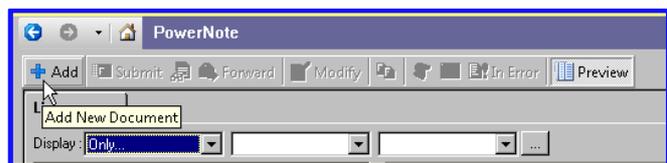

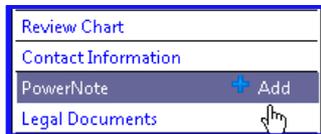

### Ophthalmology Physician Documentation Tips

All Ophthalmology physician documentation at Children's Hospital of Pittsburgh is done through Power Notes. Ophthalmology has two power notes that can be used for both in-patients and out-patients.

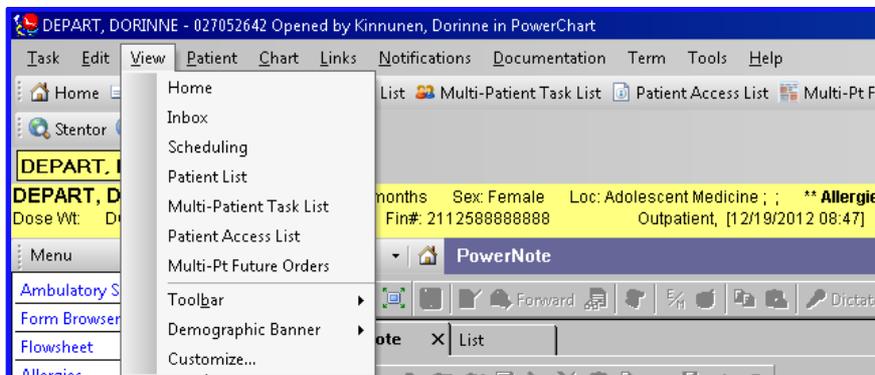

- Ophthalmology Evaluation
- Ophthalmology Testing Documentation

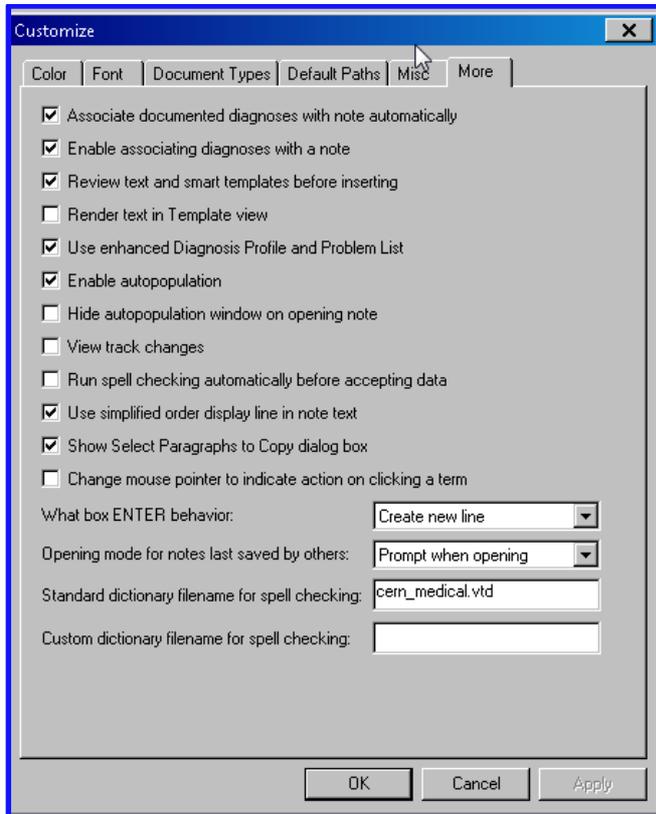

#### Using the Ophthalmology Evaluation:

The Ophthalmology Evaluation is designed to Auto-Populate with the Ophthalmology Techs documentation. Before you begin to use the note you **must** turn Auto-Population on using the following directions.

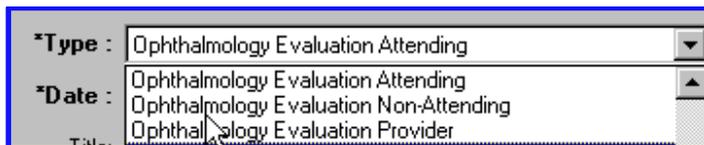

Select View  Customize from the top navigation bar

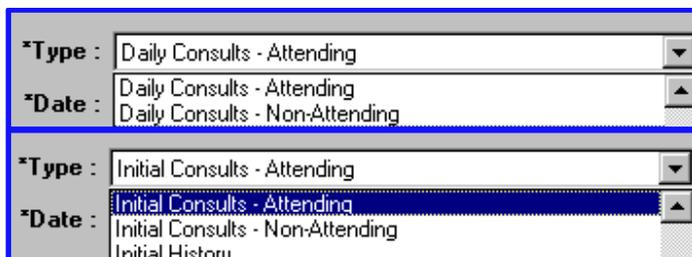

**Before beginning your Power Note, select the correct Note Type.**

**Outpatient Clinic:**

**Inpatient Consults:**

**There are 2 power notes which you should use:**

- Ophthalmology Evaluation
- Ophthalmology Testing Documentation

The screenshot shows a software interface with a search bar containing 'Ophthalmology' and a dropdown menu set to 'Starts with'. Below the search bar are checkboxes for 'Restricted display by:' including 'My notes only', 'Recent', 'Note Type', 'Favorites', 'Associated Diagnosis', and 'Recent'. There are 'Add to Favorites' and 'Delete' buttons. Below this is a table with columns: Title, Encounter pathway, Shared, Last changed by, Perform/Service Date/Time, and Sentences.

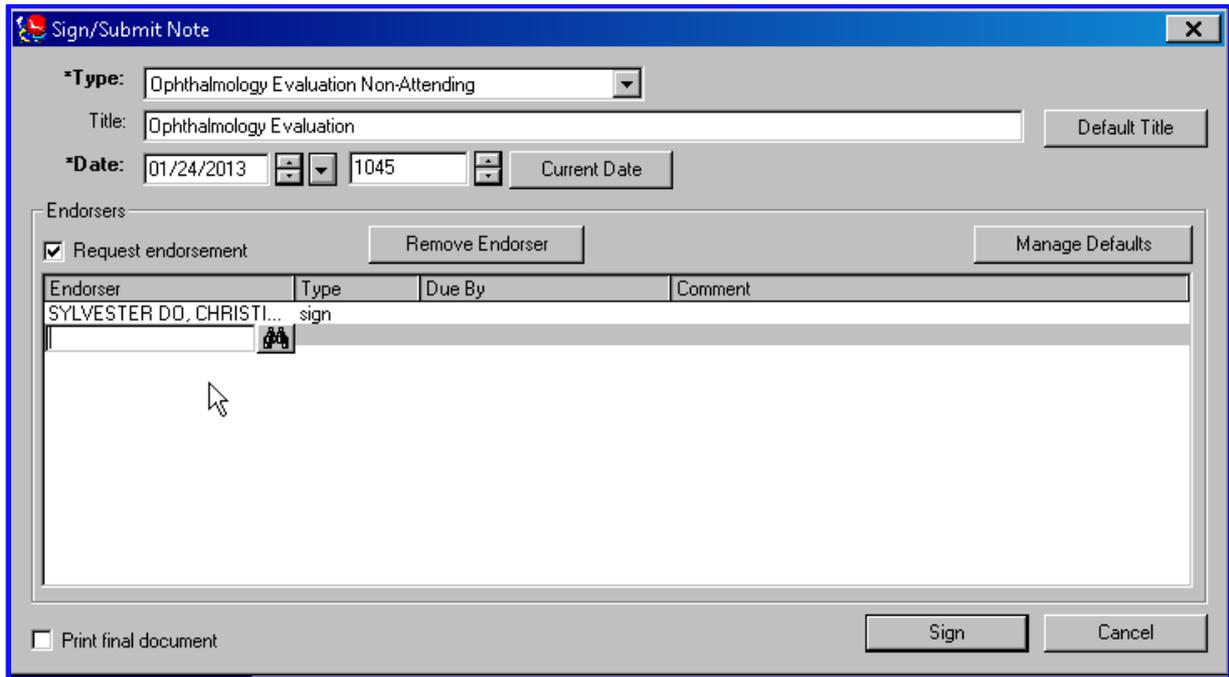

Title	Encounter pathway	Shared	Last changed by	Perform/Service Date/Time	Sentences
Ophthalmology Evaluation	Ophthalmology Evaluation	Y	Ploesch, Jacob D	6/12/2012 13:25:15	
Ophthalmology Testing Documentation	Ophthalmology Testing Documentation	Y	Svoboda, Mara	6/11/2012 22:14:57	

The screenshot shows a dialog box titled 'Auto Populate Document' for patient 'DEPART, DORINNE' with MRN '027052642'. It contains a list of 'Terms Available for Auto Population' with checkboxes for: Type of Visit Results Review, Accompanied by Results Review, Chief Complaint Results Review, Presenting Symptoms Results Review, Constitutional Results Review, Eyes Results Review, Ears, Nose, Mouth, Throat Results Review, Respiratory Results Review, Cardiovascular Results Review, and Hematology/Lymph Results Review. There is also a 'Previously Populated Data' field and 'OK' and 'Cancel' buttons.

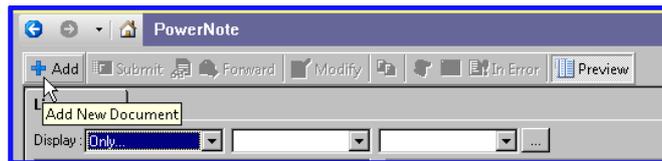

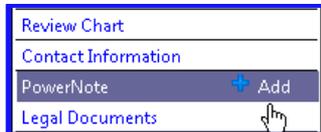

When the power note open, the information obtained during the Ophthalmology Tech's evaluation will populate your note. You can then continue your exam as usual.

- ⊖ **If you are using the note for an in-patient consult, nothing will auto-populate. You can just work through the note as usually selecting the correct choices for each piece of the exam or free-texting as appropriate.**

When you have completed your note and are ready to sign the note, remember to forward the note to the attending physician for endorsement so they know which notes they need to complete.

**If the patient is returning to clinic and you want to copy your last note for today's visit:**

\*Type : Ophthalmology Evaluation Non-Attending

\*Date : 01/24/2013 1055
